

# SOCOM6-MINI4

SOCOM SERIES COMPACT LOW BACK PRESSURE SUPPRESSOR

PRECISION  
MACHINED

EXTREME  
DURABILITY

FAST-ATTACH®  
MOUNTING

HIGH-TEMP  
ALLOY

## FEATURES

- Next-generation SureFire gas flow dynamics further reduce flash signature
- Revised front plate design provides greater durability when subjected to extreme abuse
- 60% less back pressure results in less toxic gas in the operators face, a cleaner firearm, and superior recoil control
- Optimized for 6mm ARC, the MINI4's 5.8" length provides a lighter, more compact suppressor for improved handling characteristics
- 100% Inconel construction delivers the combat-proven reliability and durability that established SureFire's SOCOM suppressor legacy
- Patented, tool-less Fast-Attach® design allows quick, easy attachment and removal
- Backward compatible with SureFire's SOCOM Fast-Attach® muzzle devices
- Optimized for SF3P, FH556RC and WARCOMP open-tine flash hiders
- Proudly made in the U.S.A. and guaranteed for life

## DESCRIPTION

The new SureFire SOCOM6-MINI4 is the ultimate 6mm ARC fighting suppressor, delivering the ideal combination of extreme durability, low-back-pressure performance, and industry-leading flash reduction for 6mm ARC weapons platforms—wrapped up in a compact SOCOM Fast-Attach® package.

Built entirely from U.S. mill-certified Inconel superalloy, the SOCOM6-MINI4 ensures uncompromising resistance to the brutal heat and erosion of sustained 6mm ARC fire, even with short-barreled rifles. Its combination of machined and 3D-printed, aerospace-grade components, and cutting-edge CNC laser welding, guarantees the unmatched structural endurance that SureFire suppressors are known for around the world.

The MINI4's all-new muzzle design improves flow and significantly reduces flash for superior signature reduction, providing the operator with a meaningful edge in stealth-critical engagements. SureFire's flash suppression performance is the finest in the industry, from the first round to subsequent rounds, even when the suppressor is hot. The beefed-up muzzle also improves durability against front-end impacts. The MINI4 will keep performing long after others fail.

SureFire's innovative low-back-pressure design reduces back pressure by a staggering 60% compared to conventional suppressor designs. That means less toxic gas in the shooter's face, a cleaner-running firearm, less wear and tear on parts, and noticeably better recoil management.

Proudly designed, engineered, and manufactured in the U.S.A., the SOCOM6-MINI4 is optimized for use with SureFire SOCOM open-tine flash hiders and backward compatible with millions of SureFire SOCOM Fast-Attach® muzzle devices already in the field. The MINI4 is mounted via our proven Fast-Attach® system ensuring lightning-fast and secure attachment and removal with no tools required.

Simply put, the SOCOM6-MINI4 is a suppressor without equal. It thrives on the modern battlefield and delivers the durability and performance professionals demand.

SPECIFICATIONS		SOCOM6-MINI4
BODY COLORS		
CALIBER		6 mm
CONSTRUCTION		High-Temp Alloy
COATING		Cerakote™ Finish
DIAMETER		1.5 in (3.8 cm)
LENGTH		5.8 in (14.7 cm)
ADDED TO WEAPON*		3.3 in (8.4 cm)
WEIGHT		16 oz (454 g)

\*Actual length may vary, depending on which SureFire adapter is used
